

CRITERION SYSTEMS, INC.

Headquartered in Northern Virginia's technology corridor, Criterion Systems, Inc. specializes in providing information technology services to the commercial sector and US federal defense and intelligence agencies.

Criterion is managed by a nationally recognized group of senior executives with extensive industry experience delivering large scale technology services engagements.

STRATEGIC FOCUS AREAS

Technology & Business Strategy—defining the innovative use of IT in business, and aligning IT, business processes, and business strategies. These services are oriented towards boosting innovation, improving operations, securing strategic technology assets, optimizing resource utilization, generating profit, growing revenues and increasing market share. Vertical market business experience, vision and creativity are as important as cost-efficiency and technical expertise.

Systems Architecture & Technology

Integration—designing, developing and rolling out applications and integration solutions. These services include analyzing business requirements, defining requirements, specifying applications, developing and maintaining applications, and integrating systems. Real time systems architecture and engineering skills are essential in ensuring that IT strategy translates to functional solutions which achieve our client's total cost of ownership objectives. We also bring business and technology expertise and cost efficiencies that are equally important considerations to our client engagements.

Managed Services—supplying and supporting infrastructure services. These services include network security monitoring, network management and custom web services solutions. These are recurring, high margin services where a single infrastructure and high level technical expertise are leveraged to support multiple client requirements.

CENTERS OF EXCELLENCE (COES)

- **Data Fusion & Meta Data**—Real-time, cross domain information access and sharing, data discovery and analysis, virtual enterprise networks
- **Enterprise Architecture and Service Oriented Architecture (SOA)**—On demand applications and services
- **Security & Federated Identity Management**—Identity and access management across organizations, IT governance, and operational risk management

OUR COMMITMENT

Criterion Systems is steadfast in our unwavering commitment to on-time and on-budget delivery of high quality and effective technology solutions, consulting services, and project management designed to meet the specific needs of our clients.
