

## **Technology Services**

### **Comprehensive IT Management and Solutions**

DDS' Service Lines consist of professional individuals employed by DDS who have the qualifications and competence to provide our clients with the best in specialized information technology-related products and services within their areas of expertise.

#### **Our Specialized Services**

##### **SOFTWARE ENGINEERING**

Provides for the design, development, and implementation of customized software applications; also includes the enhancement of existing software, or the integration of COTS software with legacy systems and applications.

##### **IT STAFFING**

Diamond Data Systems, Inc. is a leading provider of information technology (IT) contracting and staffing nationwide. Rapidly recruiting high tech professionals on contract, contract to hire or permanent basis, we enable our commercial and government clients to complete projects on time and within budget.

##### **NETWORK ENGINEERING**

Provides analysis, consultation, design, implementation, installation, configuration, maintenance, support, and troubleshooting of data communications, storage, and processing equipment.

##### **SECURITY**

Identifies areas of potential threat to networks and other IT environments, and develops appropriate responses to those threats. Appropriate responses will first begin with either an internal, external or a full security audit.

##### **ENTERPRISE STORAGE**

Consultation, design, implementation, installation, configuration, maintenance, and troubleshooting of high bandwidth networks, storage appliances, and software that convey or warehouse vast amounts of data.

##### **TECHNOLOGY CONSULTING**

Assisting clients by providing consultants to help design a 'master plan' for their IT needs.

##### **BUSINESS INTELLIGENCE**

Transforms your data from various sources, collects and uses it to make important strategic business decisions.

##### **DATABASE ADMINISTRATION**

Provides services in two main categories: Database Development and Database Management.

##### **IT MANAGEMENT**

Ensures peace of mind knowing that IT infrastructures are being properly managed and employees have functioning computers and other hardware at all times.

##### **DIGITAL FORENSICS**

Diamond Data Systems, Inc. has highly qualified forensic professionals available to handle your most sensitive IT security consulting and computer forensic needs.

##### **SHAREPOINT CONSULTING**

The DDS SharePoint Service line provides our clients with consultation, design, implementation, configuration, maintenance, and troubleshooting of Microsoft Office SHAREPOINT CONSULTING. As Microsoft Gold Partners, DDS is able to provide clients with comprehensive IT solutions.
