FEMA Planning and Technical Assistance Support (PTAS) Contract

It has been said that it is not the plan that matters; it is the process of planning that matters. That process centers around collaboration, stakeholder engagement, participation, and a robust understanding of how to prioritize risk and resources so they lead to response and recovery success. The ability to provide effective delivery of all hazards emergency assistance in communities affected by disasters is a complex, multidimensional management challenge. Collaborative planning is the foundation necessary for effective response to natural disasters, acts of terrorism, or other emergencies.

Booz Allen Can Help You Be Ready for What's Next

Booz Allen Hamilton, a leading strategy and technology consulting firm, can help build your collaborative disaster planning capability to ultimately enhance local, State, regional, and national preparedness. By using a whole community approach in the planning process from start to finish, partnerships are strengthened by involving traditional and non-traditional partners. Our team of hundreds of experienced emergency management experts has a long history of providing planning, technical assistance, and project management support in all phases of emergency management. Our experience with the Federal Emergency Management Agency (FEMA) and its partners' unique coordinating roles and missions, and national and regional planning environments, provides the knowledge and skills to help build operational readiness, and realize mission effectiveness and cost efficiency.

PTAS Services

The scope of services available under PTAS addresses research, analytical, logistical, and other planning support in accordance with FEMA's six-step planning process. Utilizing the PTAS contract enables FEMA regions and their State partners to accomplish scenario-specific or all hazards plans; assess, develop, and manage projects and programs; conduct risk and vulnerability assessments; enhance response and recovery operations; conduct and evaluate training and exercises; develop conferences and workshops; and develop information sharing tools and GIS products for improved decision making.

Booz Allen understands that planning preparation sets the foundation for all subsequent steps with the documentation of expectations, scope, planning roles and responsibilities, timeline, and methodology. We understand the guidance and intent that initiates a planning requirement, as well as whole community planning considerations, risk perspectives, scenario information, senior leader guidance, and expectations.

Booz Allen's ability to engage prevention, protection, response, recovery and mitigation authorities and stakeholders in all 10 FEMA regions, the National Capital area, and around the country illustrates our solid relationships with regional, State, and local partners. This results in enhanced integration, coordination, awareness, and connectivity among key regional entities. This multi-level insight empowers us to deliver operational and planning support with an understanding of geographically unique relationships and challenges while still remaining grounded in national homeland security doctrine.

Helping FEMA and its Partners Strengthen National Preparedness

Booz Allen is nationally recognized as an industry leader and an emergency management consultant of choice, with an unparalleled reputation as an honest broker. We have had early and sustained impact on the development, implementation, and evaluation of disaster plans, working side-by-side with Federal interagency and State and local counterparts to improve planning collaboration and coordination through deliberate and adaptive planning. We have implemented the FEMA six-step planning process, as well as the guidance and planning tools needed for its successful application. Our experience supporting emergency management missions at the Federal, regional, State and local levels, as well as with the private sector and non-governmental organizations, gives us the tools and opportunity to further engage in planning to address communities' greatest risks.

We are proud of our successful partnership with FEMA across its entire mission for more than 20 years. We support FEMA in the following areas:

- Development and implementation of national, Federal and regional planning
- Response and recovery operations
- Doctrine development and refinement
- Incident management handbooks
- Regional planning guides
- National level, Continuity of Operations, and terrorism prevention exercises
- Training program development
- Strategic planning and program development
- Program management and strategic communications
- National Special Security Events
- Regional and State emergency communications assessments and plans.

We are committed to helping FEMA fulfill its mission to work together to build, sustain, and improve our capability to prepare for, protect against, respond to, recover from, and mitigate all hazards.

Whether you're managing today's issues, or preparing for tomorrow's, count on us to help you be ready for what's next.
