

IT Infrastructure

Helping Organizations Meet Mission and Business Critical IT Infrastructure Challenges

In today's business environment, available and reliable communications infrastructure is a necessity for effective business and mission operations. The capabilities of communications infrastructure have grown and adapted to support an increasingly global market, requiring robust solutions that must be effectively planned and managed to ensure success. Furthermore, organizations are under increased pressure to integrate communications infrastructure to reduce costs and maximize the use of available resources.

Why Booz Allen

Booz Allen Hamilton, a global strategy and technology firm, understands the complex decisions organizations face as they plan, manage, maintain, and upgrade communications infrastructure. Our integrated approach provides a unique combination of engineering and management capabilities to ensure infrastructure solutions are aligned with your organization's vision and mission. Our professionals have deep technical expertise and a breadth of knowledge related to IT infrastructure and convergence. In addition, we offer proven methodologies and expertise to help organizations implement and integrate emerging network services and devices with communications infrastructure for collaboration and information sharing.

Booz Allen's IT Capabilities and Services

Our IT infrastructure experts provide a comprehensive suite of services that equip our clients to address mission and business-critical challenges. Our capabilities include:

Global Connectivity and Data

Centers. The globalization of economy, technology, and missions has significantly increased the need for businesses and government organizations to access, exchange, and share information worldwide. Booz Allen delivers infrastructure solutions and consulting services to enable global data and voice connectivity through wireline, wireless, satellite, and other hybrid/integrated technologies. We offer capabilities such as communications system engineering, emergency and disaster communications, data center design and strategy, and Internet Protocol version 6 (IPv6) networking and transition to help plan, engineer, and support systems that facilitate business and mission operations.

Infrastructure Management and

Performance Assurance. In an increasingly networked environment, today's workforce is more reliant on the availability and reliability of systems and infrastructure to exchange and share information than ever before. Network infrastructure provides access to business- and mission-critical information that improves workforce efficiency and, for government and public safety organizations, helps protect life and property.

As a result, effective management of infrastructure resources is critical to ensure network performance and maintain continuity of operations. Booz Allen offers a range of infrastructure transformation, implementation, and oversight capabilities and services for improved enterprise operations, network monitoring and visibility, and cost management.

Network Services and Devices.

Our network-enabled solutions and consulting services improve information exchange by leveraging active directory, identity management, radio frequency identification (RFID), and messaging solutions to support the needs of your workforce. From initial assessments to solutions design, Booz Allen delivers a range of capabilities, such as collaboration, content management and communications strategy, network services, commercial-off-the-shelf (COTS) integration, mobility solutions, service management, customer care and help desk solutions, and systems engineering and integration. These solutions provide an IT infrastructure foundation for all business and mission systems applications, as well as a set of network-enabled and embedded services.

Client Experience

Booz Allen has helped numerous clients from across the public and private sectors with their IT infrastructure needs, including:

- US Army: Army Material Command
- Defense Information Systems Agency
- Department of Homeland Security: Customs and Border Protection
- Department of Transportation: Emergency 911
- Defense Telecommunication Service: Washington
- Department of the Interior: Chief Information Officer
- Department of the Treasury: Chief Information Officer

About Booz Allen

Booz Allen Hamilton has been at the forefront of strategy and technology consulting for 95 years. Providing a broad range of services in strategy, operations, organization and change, information technology, systems engineering, and program management, Booz Allen is committed to delivering results that endure.
