

MELE Associates Summary

Established in 1971 and incorporated in 1993, MELE Associates is a Veteran-owned, minority-owned, award-winning small business. MELE provides information systems and technology solutions for business and government. Our team of technology and business management professionals provides expertise in the following areas:

- Strategic Planning
- Program and Project Management
- Information Technology Services/Web Design
- Nuclear & Radiological Threat Reduction Services
- Critical Infrastructure Protection Analysis and Support
- Telecommunications—Cabling, Fiber Systems Design
- Network Systems Design, Construction, Integration
- Engineering and Environmental Management Services

MELE consists of approximately 170 employees in Washington, DC; Rockville, MD; Newport News, VA; Albuquerque, NM; Honolulu, HI; San Antonio, TX; Dover, NJ; and Mechanicsburg, PA. Clients include the Departments of Defense, USAF, NAVSUP, NSA, Homeland Security, Energy, Transportation, Commerce, Interior, State, Treasury, Agriculture, Housing & Urban Development, Veterans Affairs and the EPA. With a highly competitive benefits package including full health coverage and a 401(k) with employer contributions, MELE Associates has been financially stable, debt-free and steadily growing for more than 13 years to date.

Key personnel hold DSS Secret, Top Secret or DOE Q Clearances, and the company holds a TS Facility Clearance. MELE is easily accessible through the GSA and other contract vehicles including: PES, MOBIS, IT-70, VA BPAs and BAAs, and a DOE BPA. Active projects include:

- **DOE/NSA Technical Services** – Serving as the Contract Team Lead for the MAX³ (Max Cubed) Team on this recently awarded BPA valued at \$142 million, MELE Associates is providing a strategic sourcing approach to program management, technical, and engineering services across the DOE.
- **U.S. Air Force, Total Engineering and Integration Services** – Engineering and integration services to integrate multi-mission communications and information technology payloads into host platforms for airframes, ships, vehicles and fixed base.
- **U.S. Army, Improved Countermeasures Equipment Field Services** - MELE provides Field Service Representatives for operational support and overseas logistical services in the deployment of IED countermeasures including the calibration, installation and maintenance of ICE (Improved Countermeasures Equipment) in difficult environments.
- **U.S. Navy, Naval Coastal Warfare** – To aid the Navy in ensuring uninterrupted flow of cargo and units to the combatant commander and protecting critical assets along the littorals of the U.S. and International Ports from terrorist attacks, MELE and LSI provide necessary support to key NCW and Riverine field components in: program planning, training, logistic/supply planning and subject matter expertise.
- **U.S. Air Force Surgeon General** – As chief consultant in telemedicine and deployed medical informatics to AF/SGR, MELE provides technical and program support to: oversee 30 Congressional telemedicine programs for SGR valued at more than \$100 million, manage Air Force budget/planning for telemedicine, support TMIP-J software integration program, and provide security management for SGR.
