

# HOW CAN SAILFISH HELP HEALTHCARE AGENCIES?

## CHALLENGE

The ever-increasing costs of healthcare in the U.S. has led to heightened interest in how prescription drugs are priced and utilized country-wide.

## OPPORTUNITY

Allow healthcare agencies to identify anomalies in prescription drug trends in order to inform strategic change.

## ANALYTICS

Sailfish can ingest drug pricing and Medicaid reimbursement data by state across the past four years, allowing for investigation and comparison of prescription drug prices and amounts between states.

## RESULTS

Identification of states with clear differences in amount reimbursed which may prompt further investigation in the areas of fraud, waste and abuse.
