## GLOBAL REPORTING INITIATIVE (GRI) CONTENT INDEX

The Booz Allen Hamilton 2022 Environmental, Social, Governance (ESG) Report (our “2022 ESG Report”) has been prepared in accordance with the GRI Standards: Core option. This index contains our responses to disclosures required by those standards, including certain General Standard disclosures that apply to all companies and Topic-Specific disclosures that we have identified as applicable to Booz Allen.

The GRI Standards emphasize a stakeholder-inclusive concept of “materiality” that focuses sustainability reporting on the economic, environmental, and social impacts most relevant both to an organization and to its stakeholders. Topics that may be deemed material under the GRI Standards are not necessarily material for purposes of the U.S. federal securities laws or for other purposes. For additional information on the GRI Standards, please visit the GRI Standards website.

</tbody>
</table>
To maintain a competitive advantage, Booz Allen teams with best-in-class large and small businesses to complement our services strategy and to offer our clients comprehensive, innovative solutions. We also seek services, products, and technologies from businesses to ensure our firm has a sound infrastructure and the latest technologies to enhance our working environment. Read more about Doing Business with Booz Allen.

Booz Allen believes in contributing to the communities in which we work and in helping their citizens obtain a fair share of available economic opportunities. Small business concerns and minority institutions make important contributions to Booz Allen by enhancing our competitive edge, our performance on specific contracts, and our bottom line. They also play a critical role in the future of our global economy. Read more about Booz Allen and small businesses.

Read more about our standards for subcontractors and suppliers in our Supplier Code of Conduct.

There were no significant changes to the organization's size, structure, ownership, or supply chain during the reporting period.

Our Board of Directors oversees our action-oriented enterprise risk management strategy, including ESG-related issues management. This strategy is supported by our Enterprise Risk Management (ERM) Framework, which assesses the biggest risks to the firm with potential to have significant impact to the firm's value or reputation. Led by our President and Chief Executive Officer and facilitated by the ERM Steering Committee, the ERM Framework is designed to inform effective and efficient identification of risks and facilitate the evaluation of risks as an integral part of decision making.

The ERM Framework process begins with an assessment of both prior risks and new and emerging risks. Insights are then collected from leaders through surveys and interviews on which risks they believe should be considered and addressed. The Top Risks (e.g., Tier I and Tier II) are then assigned a senior sponsor, who is responsible for risk mitigation and a risk owner who work in partnership with the Enterprise Risk & Resilience team to take the steps needed to enhance Booz Allen's organizational preparedness and reduce our risk exposure.

</table>
**GRI STANDARD** | **DISCLOSURE** | **LOCATION AND/OR DISCUSSION**
---|---|---
102-19 | Delegating authority | Our formal ESG governance includes oversight by our Board of Directors and an executive management-level ESG Committee, operational responsibility by an ESG Council, and enterprise-wide strategic direction by a dedicated function within the Office of the Corporate Secretary. These governance bodies and their authorities are described in the 2022 ESG Report. See also: 2022 ESG Report; Approach to ESG, Managing ESG Topics (Page 9)

Stakeholder Engagement

102-40 | List of stakeholder groups | See also: 2022 ESG Report; Approach to ESG, Materiality (Page 10)
102-41 | Collective bargaining agreements | Booze Allen supports the rights of U.S.-based employees under Section 7 of the National Labor Relations Act to self-organization; to form, join or assist labor organizations; to bargain collectively through representatives of their own choosing; and to engage in other concerted activities for the purpose of collective bargaining or other mutual aid or protection, as well as the right to refrain from such activities. Currently, none of our U.S.-based staff are covered by a collective bargaining agreement.

102-42 | Identifying and selecting stakeholders | See also: 2022 ESG Report; Approach to ESG, Materiality (Page 10)
102-43 | Approach to stakeholder engagement | See also: 2022 ESG Report; Approach to ESG, Materiality (Page 10)

Reporting Practices

102-45 | Entities included in the consolidated financial statements | The consolidated financial statements and notes of the Company include its subsidiaries, and the joint ventures and partnerships over which the Company has a controlling financial interest. The Company uses the equity method to account for investments in entities that it does not control if it is otherwise able to exert significant influence over the entities’ operating and financial policies. All of the entities included in the organization’s consolidated financial statements are covered by this report. ### TOPIC SPECIFIC STANDARDS

#### MANAGEMENT APPROACH

- **<GRI 103: MANAGEMENT APPROACH 2016>**

| 103 | Application of management approach to a number of topics | These management approach disclosures are applicable to all topics listed in this GRI Content Index and all material ESG topics discussed in the 2022 ESG Impact Report.  
We take an approach that combines the best of independent responsibility for management and performance, with a layer of focused, cohesive accountability, as described in our 2022 ESG Impact Report. The principles of our overarching management approach span all material ESG topics, and are facilitated by a dedicated ESG function and cross-functional governance bodies. This structure serves to (1) enhance consistency through an integrated management approach to firmwide ESG performance, and (2) support collaboration, by providing a platform for broad initiatives. |
| 103-1 | Explanation of the material topic and its boundary | Explanation of Materiality:  
2022 ESG Report: Approach to ESG, Materiality (Page 10)  
Boundary:  
2022 ESG Report: Approach to ESG (Pages 7-11)  
Limitations on Boundary:  
2022 ESG Report: About This Report (Page 71) |
| 103-2 | The management approach and its components | Explanation of Management Approach:  
2022 ESG Report: Approach to ESG (Pages 7-11)  
2022 ESG Report: Corporate Governance, Board of Directors (Page 44)  
2022 ESG Report: Corporate Governance, Enterprise Risk Management (Page 47)  
Statement of Purpose of Management Approach:  
We’re committed to bringing together teams and leaders across our firm who have long been working to enhance our positive impact and avoid, mitigate, or remediate any negative impact, both independently and together, applying their expertise and experience against a shared purpose for cohesive impact and innovation. Our approach seeks to drive long-term growth and sustainable value for our stakeholders through enhanced transparency and strengthened incorporation of ESG considerations into our business strategy.  
Components of Management Approach:  
Our management approach for all material ESG topics is grounded in our purpose and values as well as our Code of Business Ethics and Conduct. Our Code sets expectations and requirements for our conduct and refers to myriad other policies that apply to various aspects of our work, the way we do business, and the way our employees interact with each other, our clients, and our communities. Each of these policies forms an aspect of our approach to managing applicable impacts. |
The management approach and its components

Our commitment to ESG and the responsibility to act on that commitment is invested in the highest levels of governance of the firm—the Board of Directors, through the Nominating and Corporate Governance Committee of the Board and the Board-authorized executive-level ESG Committee. Booz Allen both empowers its employees and requires them to raise a concern if they see something that they think, or have a good reason to suspect, may violate the law, our Code or a firm policy, put at risk an individual’s health or safety, cause undue risk to the firm, or jeopardize the security of sensitive firm information or a third party’s sensitive or classified information entrusted to the firm. Booz Allen has zero tolerance for retaliation against anyone who raises an ethical or legal concern in good faith, asks a question, or cooperates with an investigation. Anyone who violates this non-retaliation policy is subject to disciplinary consequences.

Evaluation of the management approach

Mechanisms for Evaluation:

Our management approach is evaluated through the ESG governance structure in coordination with various functions throughout the firm responsible for managing elements of a given material ESG topic and in consultation with our stakeholders.

Evaluation Results:

The ESG Team continuously assesses our management approach using the benchmarking and analytics software described in our discussion of ESG topic materiality (Page 10). The ESG Team regularly briefs function leaders, as well as ESG Council and Committee Members, on internal and external audit findings, ESG raters assessments, and feedback from stakeholders including investors.

Adjustments Related to Evaluation:

The ESG Team works with other functions at the firm, as appropriate, to facilitate adjustments based on the evaluation of the management approach, working with the ESG Council and Committee, and under the guidance of the Board of Directors.

Direct economic value generated and distributed

Information regarding revenue, operating costs, payments to providers of capital, payments to the government may be found in the Booz Allen FY22 Annual Report Form 10-K. Other direct economic value information that is not provided in the Booz Allen FY22 Annual Report Form 10-K is omitted as confidential.

Community investment value in the forms of charitable cash contributions and pro bono services is detailed in the 2022 ESG Impact Report; Drive Community Resilience, Resilience through Community Engagement (Pages 41-42).

Communication and training about anti-corruption policies and procedures

Booz Allen’s anticorruption policies and procedures are contained within our Code of Business Ethics and Conduct and Supplier Code of Conduct, and posted on our corporate website. Additional, detailed policies, such as our Anticorruption and Anti-Bribery Policy, Working with Ethical Business Intermediaries Policy, Gifts and Business Courtesies Policy, Preventing Money Laundering and Terrorist Financing Policy, among others, are communicated to all employees, and made publicly available on our corporate website.

We require firmwide annual Ethics & Compliance training to help guide employees and provide them with the information needed to live our purpose and values and to adhere to our Code of Business Ethics and Conduct. The firmwide training covers a variety of risk-based focus areas such as Data Privacy and Protection, Information Security, Competition, Anti-corruption, Organizational Conflicts of Interest, and Intellectual Property.

**ENVIRONMENTAL STANDARDS**

**EMISSIONS** <GRI 305: EMISSIONS 2016>

305-1 Direct (Scope 1) GHG emissions

Scope 1 – Fleet Vehicles and Generators: For Booz Allen vehicles, we used vehicle make, model, and mileage data provided by the local Booz Allen office associated with the vehicle to calculate emissions. We converted the reported data into CO$_2$e emissions using GHG Protocol's tool for calculating emissions from mobile sources. Emissions in the calculation include CO$_2$, CH$_4$, and N$_2$O, and the emissions factors and global warming potential values used were from the 2014 IPCC Fifth Assessment Report.

Booz Allen directly purchases and consumes diesel fuel for use in emergency generators on a small number of our sites. We track quantity of fuel purchased and utilize the World Resource Institute GHG Protocol tool for stationary Combustion to calculate total emissions. Emissions in the calculation include CO$_2$, CH$_4$, and N$_2$O, and the emissions factors and global warming potential values used are from the 2014 IPCC Fifth Assessment Report.

Scope 2 – Facilities: Booz Allen's U.S. and international real estate holdings comprise approximately 2.7 million square feet of leased space. Booz Allen neither owns nor manages the buildings we occupy. Consequently, all facilities emissions fall within Scope 2. We calculate these emissions by estimating electrical consumption based on the number of occupied square feet in our domestic and international portfolio. For both U.S. and international facilities, we used data from the U.S. Energy Information Administration's 2012 Commercial Buildings Energy Consumption Survey to determine the average kilowatt hours (kWh) of electricity buildings comparable to those in our portfolio consume per square foot each year. We then estimated our own kWh consumption by multiplying these national averages by the number of square feet in each Booz Allen facility.

In FY21, we were able to access utility bill data for 17 Booz Allen facilities, comprising nearly 40 percent of our total leased square footage. For these facilities, we were able to retrieve actual kWh consumption, as opposed to estimating using the aforementioned process.

After kWh consumption was determined, for U.S. facilities, we used the GHG emissions factors from the U.S. Environmental Protection Agency's (EPA) 2018 Emissions and Generation Resource Integrated Database to calculate each building's emissions (differentiated by region). The formula we used to calculate emissions is: GHG emissions = Electricity consumed (in MWh) x EPA regional GHG emissions factor. We converted nitrogen dioxide and methane emissions to carbon dioxide equivalents (CO$_2$e) using global warming potentials from the United Nations Intergovernmental Panel on Climate Change Fifth Assessment Report. Emissions in the calculation include CO$_2$, CH$_4$, and N$_2$O.

For international facilities, we substituted EPA regional emission factors with International Energy Agency (IEA) CO$_2$ emissions factors specific to each country. Emissions in the calculation include CO$_2$.

Scope 3 – Business Travel and Commuting: Our calculations include estimated emissions from employee business travel, which we define as work-related air travel, car rentals, billable personal miles, and hotel stays. We also estimate emissions associated with employees' commutes to and from work. These estimates were provided by our travel providers, who work closely with us to track the environmental impact of each trip. All business travel and commuting emissions are Scope 3. Emissions in the calculations include CO$_2$, CH$_4$, and N$_2$O.

Our Scope 1 Emissions increased to 40.54 MTCO$_2$e from 32.00 MTCO$_2$e in FY21.

Our Scope 2 Emissions from our facilities increased to 14,298.82 MTCO$_2$e from 13,825.00 MTCO$_2$e in FY21.

Our Scope 3 Emissions increased to 33,612.34 MTCO$_2$e from 23,710.16 MTCO$_2$e in FY22 (up from 23,710.16 MTCO$_2$e in FY21, but down from 96,372.75 MTCO$_2$e in FY20). While still significantly below our FY20 baseline year, our emissions increased as the conditions of the pandemic improved in the latter half of the fiscal year, allowing our company to resume necessary business travel and employees to return to the office as local conditions permitted.

Booz Allen's emissions methodology and calculations were reviewed and verified by Apex Companies, LLC.

Additional information and details about our FY22 Greenhouse Gas Emissions can be found in:

- FY22 Carbon Footprint Report
- FY22 CDP Response
- 2022 ESG Report: Drive Community Resilience, Climate Change (Page 38)
- Environmental Sustainability
305-2  
Energy indirect (Scope 2) GHG emissions  
See response in 305-1 for Standards, Methodologies, and Assumptions used for GHG Calculations.

305-3  
Reduction of GHG emissions  
See response in 305-1 for Standards, Methodologies, and Assumptions used for GHG Calculations.

305-4  
GHG emissions intensity  
Emissions intensity measurements:  
0.51 MTCO₂e/FTE employee  
0.0054 MTCO₂e/Per Square Foot  
Calculations are based on US-only employees and apply to Scope 2 emissions. Scope 1 GHG emissions from fleet and combustion generators and Scope 3 emissions from business travel and employee commuting are not captured in the emissions intensity ratio, because the base metric is building floor area.  
See also:

401-1  
New employee hires and employee turnover  
Consistent with our commitment to diversity, equity, and inclusion, we report the composition of new hires and departures by demographic categories on page 15 of our 2022 ESG Report.  
See also:  
FY22 Annual Report; Part I, Item 1, Human Capital (Page 4)

401-2  
Benefits provided to full-time employees that are not provided to temporary or part-time employees  
In the U.S., where approximately 94% of our workforce is based, all benefits that are standard for full-time employees are also available to part-time employees who work at least 20 hours per week on a regular basis. Additionally, all part-time employees are eligible for Paid Time Off, which accrues in proportion to hours regularly worked per week.
