

COMBAT LINKWEAR

Combat Linkwear delivers intelligent, configurable ensembles to transition the warfighter to a mission adaptable platform at the edge.

Booz Allen is transforming the warfighter ensemble industry with the integration of digital engineering solutions that create intelligent systems in the form of wearable, high-tech garments. Combat Linkwear enhances warfighter performance with increased situational awareness, agility, and decision making through embedded sensors and power suites that can be customized to the combat mission.

FEATURES:

- + **EMBEDDED SENSOR AND POWER SUITE:** An open, standards-based, body-worn technology suite with miniaturized, low-power hardware electronics. Configurable ensembles reinforce a plug-and-play approach that can be customized to the warfighter's role and mission. Device agnostic design reduces vendor lock and allows for seamless adoption of new technologies in lockstep with future warfighter needs.
- + **INTELLIGENT E-TEXTILES:** Novel ensembles with embedded smart textile technologies, sensor suites, communication networks, and power sources enhance agility. Eliminates the need for separate cable and power devices, addresses integration deficiencies between performance and protection needs, and mitigates size, weight, and power considerations.
- + **ANALYTICS-DRIVEN PERFORMANCE:** Utilizes data from body-worn sensors that provide near real-time health and performance metrics to enhance situational awareness and decision making. Adaptable to the warfighter's end-user device, capabilities increase lethality and survivability at individual and small unit levels during operations without adding cognitive burden onto our warfighters.

Intelligent e-Textiles

About Booz Allen

Booz Allen is the premier digital integrator for the Department of Defense, blending decades of mission experience with state-of-the-art AI/ML, next-generation data solutions, networking, cyber, and advanced software development to help DOD achieve information dominance. We bring our defense clients the best emerging technology to help them quickly and easily modernize, achieve interoperability, and win.
