

Modelpoint™ — Accelerating Mission Impact

At Booz Allen, we empower the U.S. federal government to harness emerging data and capabilities for its most dynamic missions. Booz Allen Modelpoint, our massively scalable data science and analytics platform, delivers automated exploitation, data-driven reporting, and multicloud Analytics-as-a-Service. By leveraging thousands of commercial and publicly available sources, our Modelpoint solution uses a layered analytics approach to empower decision making, with intelligence products and services seamlessly delivered into client systems.

Our Approach

The Modelpoint solution fosters greater partnership between government and industry, setting a new standard for Commercial Solutions, Data/Analytics as-a-Service, and cross-domain operations.

Secure & Interoperable

- The Modelpoint solution operates through an open application programming interface (API) multicloud architecture ensuring maximum compatibility with industry partners and government tools and databases—all protected by top-tier zero trust cybersecurity protocols and virtual private networks.

Layered Analytics

- We orchestrate the collection and automated exploitation of diverse data through dynamic model stacks, including computer vision, spatial statistics, graph, and other advanced algorithms with machine learning and emerging techniques.

Massively Scalable

- Our solutions encompass multicloud analytics, distributed storage and processing, and available graphics processing unit (GPU) caching and computation.

Multi-Domain Integration

- Our architecture supports the integration of data products from commercial domains into government domains, operating and delivering into multicloud environments for national security missions.

Modelpoint Solutions Industry Partners Receive

- Flexible API gateways to connect proprietary data and analytic pipelines.
- Streamlined architectural and engineering support.
- Rapid access to Booz Allen intelligence products and services.

Modelpoint Solutions Government Clients Receive

- Exponentially increased capability for processing cross-domain, multimodal, big datasets to include imagery, radio frequency, and other technical sources.
- Resource savings through automation and the use of commercial data and capabilities hosted offsite and through commercial infrastructure.
- Faster impact of data on strategic decisions and mission operations.

What Sets Us Apart

Booz Allen is dedicated to innovation and the use of new data and services for human and global security, not software sales or complex licensing agreements. The Modelpoint solution enables us to offer the most impactful industry-driven analytic solutions, delivering products and services that maximize mission value.

- **Flexible Licensing and Information Sharing:** The Modelpoint solution's data products are licensed for extensive use across the U.S. government, with the flexibility to share even more broadly with end users. Our services can be seamlessly delivered via API or cloud endpoint across multiple federal networks, integrating directly into existing government systems.
- **Embracing the Modeling Ecosystem:** The Modelpoint solution is designed to accelerate and complement existing government tools, not replace them.
- **Flexible Contracting Options:** We offer modeling and automation solutions, available as standalone offsite work orders or as a complement to existing staffing solutions.

About Booz Allen

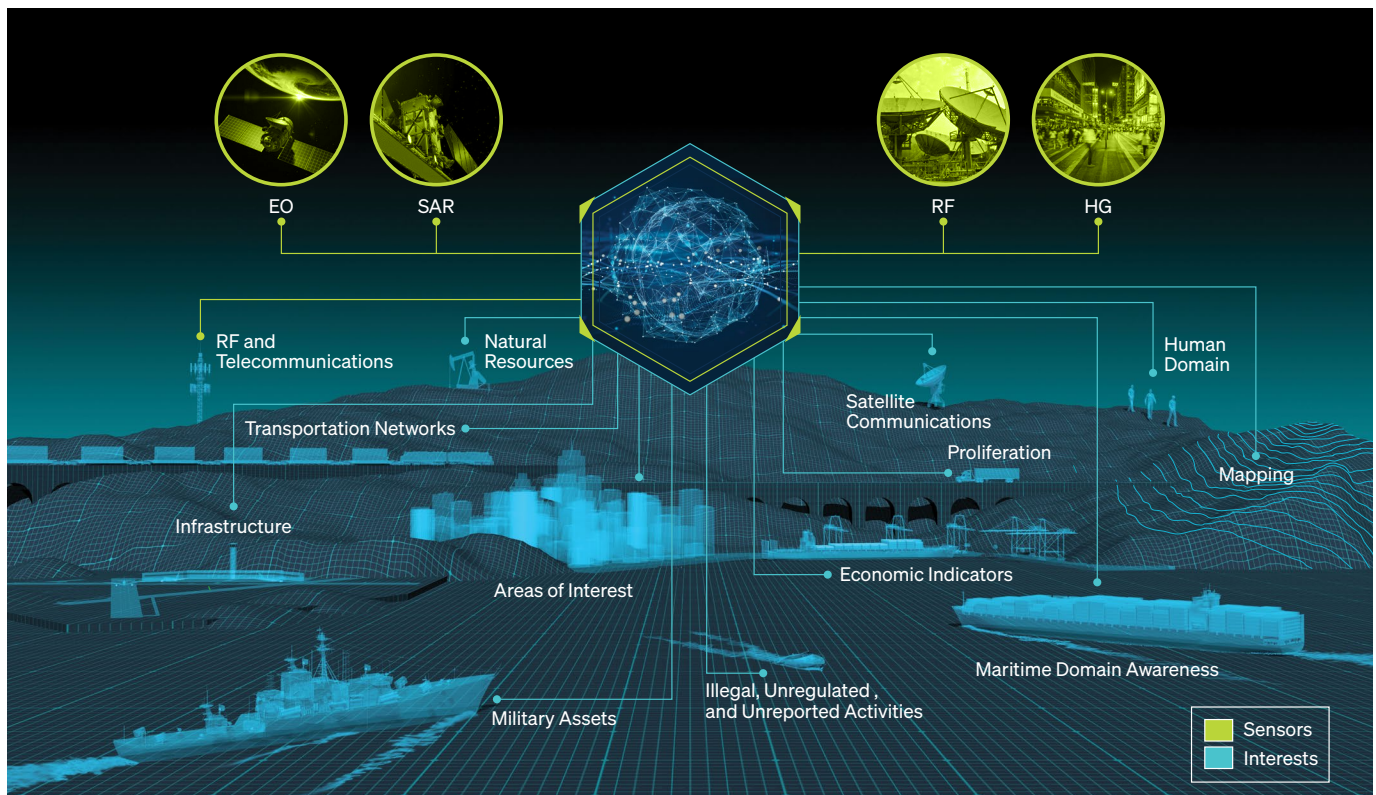

Booz Allen is the advanced technology company delivering outcomes with speed for America's most critical defense, civil, and national security priorities. We build technology solutions using AI, cyber, and other cutting-edge technologies to advance and protect the nation and its citizens. By focusing on outcomes, we enable our people, clients, and their missions to succeed—accelerating the nation to realize our purpose: Empower People to Change the World®.
